## NUMERICAL INDEX OF EFFECTIVE PAGES

### List of Current Changes

Original.....0.....1 Sep 98

Only those pages assigned to the manual are listed in this index. If the numerical sequence is broken in the list, the missing page numbers have not been assigned to this manual. Insert Change      pages dated      . Dispose of superseded pages. Superseded classified pages shall be destroyed in accordance with applicable security regulations. The portion of text affected in a change or revision is indicated by change bars or the change symbol "R" in the outer margin of each column of text. Changes to illustrations are indicated by pointing hands, change bars, or MAJOR CHANGE symbols. Changes to diagrams may be indicated by shaded borders.

Total number of pages in this manual is 824consisting of the following:

**LIST OF TECHNICAL PUBLICATION DEFICIENCY REPORTS INCORPORATED**

**ORGANIZATIONAL MAINTENANCE**

**PARTS LIST INDEX**

---

1. The TPDRs listed below have been incorporated in this issue.

IDENTIFICATION NUMBER/ QA SEQUENCE NUMBER	LOCATION
NONE	

---

## INTRODUCTION

## ORGANIZATIONAL MAINTENANCE

## PARTS LIST INDEX

---

### 1. PURPOSE AND SCOPE.

2. This manual contains the Numerical Index of Part Numbers and the Numerical Index of Reference Designations for all parts data contained in the Organizational System Maintenance Manuals.

### 3. MANUAL ISSUE DATE.

4. The date on the title page is the copy freeze date. No additions, deletions, or changes are made after the manual issue date. Data collected after the manual issue date will be included in later changes or revisions of the manual.

### 5. REQUISITIONING AND DISTRIBUTION OF NAVAIR TECHNICAL PUBLICATIONS.

6. Procedures to be used by Naval Activities and other Department of Defense organizations requiring NAVAIR technical publications are defined in the NAVAL AIR SYSTEMS COMMAND TECHNICAL MANUAL PROGRAM manual, NAVAIR 00-25-100 and NAVAIRINST 5605.5, Distribution of aeronautic technical publications. To automatically receive future changes and revisions to NAVAIR technical manuals, an activity must be established on the Automatic Distribution Requirements List (ADRL) maintained by the Naval Air Technical Services Facility (NAVAIRTECHSERVFAC). To become established on the ADRL, notify your activity central technical publications librarian. If your activity does not have a library, you may establish your automatic distribution requirements by contacting the Commanding Officer, NAVAIRTECHSERVFAC, Attn: ADRL REQUEST, 700 Robbins Avenue, Philadelphia, PA 19111-5097. Annual reconfirmation of these requirements are necessary to remain on automatic distribution. Please use your NAVAIRTECHSERVFAC assigned account number whenever referring to automatic distribution requirements.

If additional or replacement copies of this manual are required with no attendant changes in the ADRL, they may be ordered by submitting a DD 1348 requisition directly to the Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Road, Philadelphia, PA 19120-5099.

### 7. NUMERICAL INDEX OF EFFECTIVE PAGES.

8. The change status page and numerical index of effective pages (A Page) provides the user with the current status of the publication.

9. Under the subtitle "List of Current Changes" the numbers and dates are listed for all actions which have affected this publication beginning with the initial issue or most recent revision. The initial issue or most recent revision is identified as "Original. . .0".

10. The list of effective pages is divided into two columns: Page Number and Change Number.

### 11. TECHNICAL PUBLICATIONS DEFICIENCY REPORT (TPDR).

12. The TPDR (OPNAV FORM 4790/66) is the form for reporting errors and suspected omissions in the technical manuals. Reporting procedures are in OPNAVINST 4790.2 SERIES.

### 13. NUMERICAL INDEX OF PART NUMBERS.

14. Page numbers (N000X-00) appear in the extreme upper right corner of each page. Letter "N" indicates numerical index page number.

15. **THE PART NUMBER COLUMN.** Data is arranged in alpha-numerical sequence by part number to allow rapid location of part numbers. Part number arrangement starts at the extreme left position and continues, one position at a time, until

all numbers are arranged. The sequence for the extreme left position is listed below:

Letters A thru Z  
Numerals 0 thru 9

The sequence for the second and remaining positions is listed below:

Space (blank column)  
Dash (-)  
Letters A thru Z, then  
Numerals 0 thru 9

#### NOTE

Alphabetic O's are listed as numerical zeros with the exception of its use in proper nouns. Proper nouns are used, in the part number column, instead of a dash (-) and the captions NO NUMBER and COML that appear in the part number column of the Work Package Parts List.

16. The part numbers of Weapon Replaceable Assemblies (WRA) will indicate only the Publication/Work Package and Figure/Index Number where the WRA is removed and replaced/repaired.

17. Superseded part numbers, if available through salvage, may be used for replacement. The location given in the numerical index is that of the superseding part number. The superseded part number will appear only in the description column of the superseding part, for example (supersedes 74A582090-1003).

18. **Special Characters.** The special characters that may be printed in the Part Number column are shown below, and must be included in the part number when ordering parts.

" (Quotation Mark)  
# (Number Sign)  
\$ (Dollar Sign)  
% (Percent)  
& (Ampersand)  
' (Apostrophe)  
() (Parentheses)  
\* (Asterisk)  
+ (Plus)  
? (Question Mark)  
@ (Commercial)

, (Comma)  
- (Hyphen, Minus, Dash)  
. (Period)  
/ (Slant, Slash)  
: (Colon)  
; (Semicolon)  
= (Equal)

19. Some special characters cannot be printed in the Part Number column by automated equipment and are converted. The conversions, as shown below, identify how the part number will appear in the Description column of the parts list and Part Number column. Converted part number must be used when ordering parts.

#### NOTE

The unconverted part number is shown in the description column following the manufactures code, and may be the part number found on the actual part.

Description Column	Part Number Column
± (Plus or Minus)	PORM
° (Degree)	DEG
e (Lower case letter)	E
II (Roman Numeral)	2
.001 (Decimal)	0.001

20. **Extended Part Numbers.** Part numbers which exceed the width of the part number column are continued on the next line, indented and right justified. Publication/Work Package, Figure/Index Number and SM&R Code Columns are shown on the first line only. These columns are blank on the continuation line.

21. **SUPERSEDED PARTS.** Superseded part numbers have been removed from the Part Number column and placed in the Description column of the superseding part (for example - supersedes 74A582090-1003). This indicates that the superseded part is usable if available through salvage, but should not be requisitioned or made.

22. **REDESIGNED PARTS.** When the design of a part is changed to the extent that interchangeability is affected, the new part number will state in the

description column, Replaces 74AXXXXX-XXXX. If the old part has continued application it will remain in the part number column following the new part. Usable on codes will be used to show usability. In addition the explanatory notes ("Use until exhausted") for procureable parts and (replaced by XXXXX) for nonprocureable parts will be in the description column of the old part. of electrical, electronic and mechanical equipment is arranged in alpha-numerical sequence.

**23. PUBLICATION/WORK PACKAGE AND FIGURE/INDEX NUMBER.** The Publication/Work Package and Figure/Index Number columns list where each part is shown in the parts list of the Organizational System Maintenance Manuals. For government and contractor standard parts, only the publication, work package, figure and index number of the first appearance in an Organizational System Maintenance Manual is listed.

24. The dash (-) that appears in the Figure position of the Figure/Index Number column, indicates that the publication/work package does not have a figure number assigned.

25. When an index number appears in the index position of the Figure/Index number column, it indicates the area of the parts list where that part number can be found (i.e. it may be the index number assigned to the part number or the index number of a previous part). This method is used to assist the one who uses these publications in finding

the part in the parts list whether or not it has been assigned its own index number.

**26. SOURCE, MAINTENANCE AND RECOVERABILITY (SM&R) CODE COLUMN.** The codes in this column are assigned per NAVAIRINST 4423.3 SERIES and NAVSUPINST 4423.14 SERIES which contain definitions. A dash (-) is shown in the SM&R code column when no code has been assigned. The Aviation Supply Office P2300 series publication is to be used for the most current SM&R Code assignment information if doubt exists as to the validity of any SM&R Code listed in an IPB. Refer to figure 1 for SM&R code explanations.

**27. NUMERICAL INDEX OF REFERENCE DESIGNATIONS.**

28. Page number (R000X-00) appears in the extreme upper right corner of each page. Letter "R" indicates reference designation index.

29. The reference designators of Weapon Replaceable Assemblies (WRA) will indicate only the Publication/Work Package and Figure/Index Number where the WRA is removed and replaced/repared.

30. The Publication/Work Package and Figure/Index Number Columns list where each reference designation is shown in the description column of the parts lists of the Organizational System Maintenance Manuals.

SOURCE				MAINTENANCE
